

# Peace of Mind Program

Endorsed by Andrew County Ambulance, Andrew County Sheriff's Department,  
and Savannah Police Department

**If you fell today and couldn't get to the door to unlock it for Police, Fire, or Ambulance, how would they get to you to help you?**

## Methods of Forcible Entry:

- Breaking a window to enter
- Breaking the door or door frame
- Breaking the door knob

## Methods used by some:

- Hiding a key. If you hide the key the how are First Responders supposed to find it?
- Some have neighbors that have a key, which is great if they are home and remember where it is.

**How can you and your loved ones have peace of mind? Get a lock box for a key to your home.**

**Purchase a lock box. You can buy them at many hardware stores or the Ambulance District for under \$25**

## Peace of Mind

**Once you have a lock box installed you can give the code to dispatchers. When there is an emergency, that code can be given to First Responders to be able to help you.**

# **How this works!**

- 1. Purchase a lockbox at your local hardware store and install it at your home.**
- 2. Contact the Andrew County Sheriff's Department and let them know you have a Key Lockbox. Tell them your address, the location of the lockbox, and the code to get into the box.**
- 3. When Police, Fire, or Ambulance are called, your location will show up and if needed, be able to access the lockbox to get to you.**
- 4. After you are cared for, if you are transported, the house can be relocked and the key returned to the lockbox.**

Andrew County Ambulance District has locks you can purchase at their cost. Ambulance staff can be scheduled to help you install locks at your home also.
